

Amyris Emeryville - California

Project Challenge:

Amyris' requirement to provide a cutting edge solution which allows end user customization, combined with the fact that they selected COG after preliminary work was already performed by a competing vendor, challenged us to deliver a budget conscience solution in a very compressed schedule.

Project Milestones:

COG presented Mock-up to compete with existing mock-up that was "too open" and did not provide adequate storage. Within a time-frame of less than three weeks the COG team provided many design options and assisted in the final programming.

Phase 1 was ordered in May 08 and installed with minimal punch within 10 weeks. Phase 2 was completed in Aug. 08. Users wanted open plan to a harvest natural daylight and collaborative team environment to attract a "next generation" work force. The end result was a completely satisfied client.

Project Scope:

200 workstations, 14 conference rooms, break rooms and reception.

"COG has provided dependable service and Haworth has delivered on time for both phases of our relocation to Emeryville. Haworth Premise has helped us to attract and retain skilled and dynamic employees. I would recommend working Haworth and Contract Office Group."
