

City of San Jose - Civic Center

Project Challenge:

COG was awarded the bid and had less than 3 weeks to finalize design, specify and then installed 1,600 workstations in 11 weeks. Haworth shipped on time and complete.

Haworth Unigroup Too was selected based on a minimal kit of parts, universal hinge and ease of reconfiguration.

Our Design Team worked to provide installation drawings and a complete specification ready for order entry. The initial installation took over 3 months and was completed on time and with minimal punch.

Since 2002, we have provided ongoing service and reconfigurations.

"Contract Office Group worked through a tight eleven week sequence to conduct a smooth installation that was integral to the entire occupancy process. COG certainly achieved project success and continues to manage ongoing change."
